

DIVSYS Aerospace & Engineering LLC Conflict Minerals Report

Gold (Au) and Tin (Sn) are the only metals of concern, covered by the U.S. Conflict Mineral Law, used in our product, known as printed circuit boards (PCB) and printed circuit board assemblies (PCBA).

Not all our suppliers providing PCBs to DIVaero have provided statements concerning conflict minerals. DIVaero will continue efforts to acquire commercially reasonable due diligence statements from our PCB suppliers. Therefore, DIVaero is currently unable to verify the sources of Gold and Tin used in our PCBs.

DIVaero has both a "Statement of Conflict Minerals" for our customers and a "Statement of Conflict Minerals Sourcing" for our suppliers. These statements are listed on our website.
